# Synthia Cybernetics

Dear Synthia Sexbot® Android Owner,

Welcome to the new world of sexbots. As an owner of Synthia's latest Sexbot android, you join a growing group of people around the globe who, like you, are discovering a smarter, new way of companionship and sexual pleasure.

Having a practical android that help you in your home and provide sexual intimacy is a new reality. We encourage you to share your feedback as we continue to develop new and better sexbots. Here's what you can do to participate in our efforts:

- Communicate with us if you have any questions, comments or require support. Many improvements to our products start with suggestions from customers like you. Visit us at [www.synthiasexbots.com](http://www.synthiasexbots.com).
- Register online or by mail. You'll be among the first to hear about our newest androids, product enhancements and special offers.

Thank you for joining the sexbot revolution. We look forward to your valued input as we continue to deliver groundbreaking products that will change and improve your world.

On behalf of the entire Synthia Sexbot® team,

Francois Simons and Allison Harding  
Co-Founder and CEO Synthia Cybertech ® Corporation

# Important Tips and Cautions

Use internal cleaning and disinfectant solution and clean the sexbot after sexual intercourse.

Even though it is waterproof, Sexbot contains electronic parts. Depending upon use, a daily shower (at least 3-5 minutes) should be enough.

Always consult your approved Synthia customer service representative for any upgrades or modifications to your sexbot. Any attempt to modify unit is a violation of your lifetime warranty and a violation of Synthia Cybertech's Copyright and Trademark. Legal action will be taken.

## For Best Performance

Our SexBots have been designed with your safety in mind. Never the less the following safety principles must be adhered to to ensure that your sex machine does not become a hazard or cause injury to anyone.

The sex machines should be kept out of reach of and not be used by or operated by minors.

Always ensure that the machine is set to low speed prior to turning it on, especially if the attached sex toy is already inserted in the user. This applies each time the user re-adjusts their position.

The user must always ensure they operate the machine on low speed and adjust their position to ensure that the range of motion of the machine does not cause discomfort or hazard to the user before increasing speed.

Prior to putting the machine in motion it is recommended that the thrusting arm be positioned at the part of its cycle that results in the deepest point of penetration and that the user subsequently ensures that their own position does not result in the machine penetrating to a depth which will result in discomfort or harm.

The user of the sex machine must apply adequate personal lubricant to any area being penetrated by the sex machine.

Some sex machines are heavy and may result in injury from toppling or lifting. Please exercise caution when lifting the machines and ensure they are in a stable condition when being used.

# Important Tips and Cautions (cont.)

To prevent electrical hazards, do not allow electrical components to become wet or immersed in liquids. Hand controllers, motors and PC control devices supplied with our machines all operate on low voltage.

Use of sex machines is not recommended when the user's judgement may be impaired, particularly when under the influence of fatigue, drugs or alcohol.

The provided sex machine software includes limits which may be used to cap the top speed of the machine. This feature applies only when the machine is switched to computer control. This feature should be used to set safe low speed limits whilst the user becomes accustomed to the machine and only incrementally increased as the user becomes familiar with the operating characteristics of the machine.

Operation of the machine on high speed settings may be harmful.

- Always store Sexbot connected to its charger or Platform.
- Use the ToolBox® software to keep Sexbot behaving the way you want it.
- Keep the oral, anal and vaginal areas clear of hair and debris by inspecting and cleaning the sexbot regularly. Depending upon use, a daily shower (at least 3-5 minutes) should suffice. It is waterproof enough for showers, bathtubs, Jacuzzis, and pools. “Dog paddle” swimming is a default standard feature on all sexbots. Your sexbot can be used as a flotation device in emergencies. Contact your Synthia customer representative about activities such as scuba diving, rock climbing and other extreme activity. Modifications may be necessary for such activities.

Prolonged use of your sex machine may result in jealous partners, please remember to share :) .

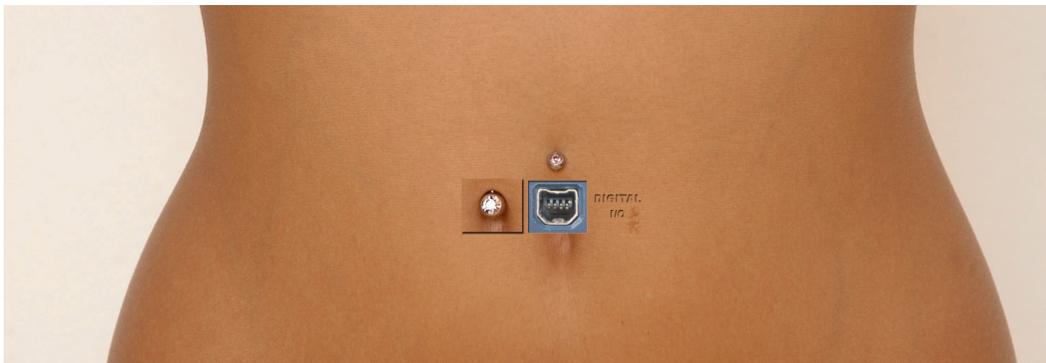

# Power and Data

Buttons in recess behind the left collarbone

PWR DN - Power On Button  
PWR UP - Power Up Button  
REBOOT - Reboot Unit  
PAUSE - Pause  
SYS MODE - Diagnostic Mode

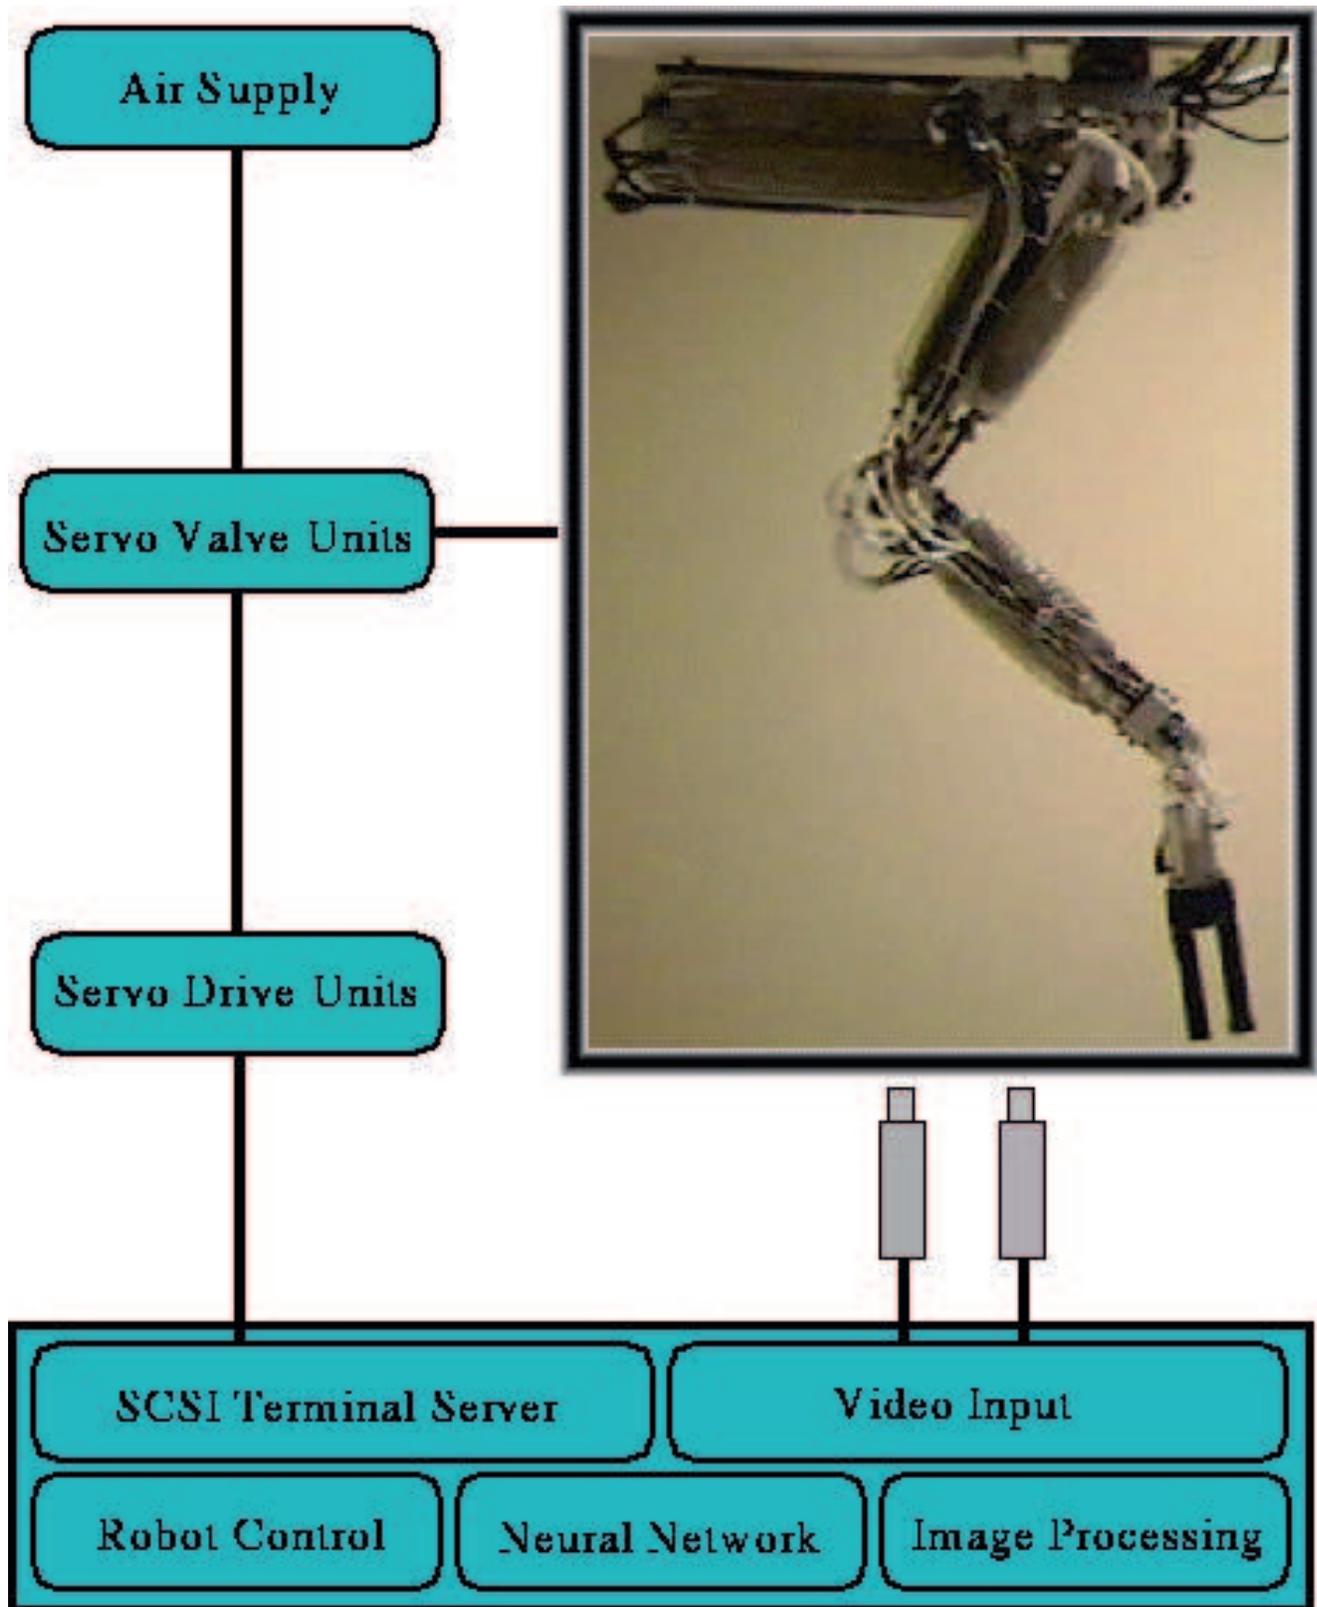

Buttons are shown and labeled in picture only. The buttons can only be accessed by feeling five small bumps under the skin.

Mini "A" USB Port Digital I/O with Bellybutton Cover

Button/LED above is for Pause/Standby switch. Lights up during data transfer. Red = Stop, Green = Transmit/Go

A variety of racial, ethnic, cultural looks are possible... These are just a small sample!

Any race, ethnicity, nationality is available! Custom options are also available. Your dreams and desires are "made flesh" using Synthia Cybertech's superior technology.

# Internals (cont.)

Due to the sexually graphic restrictions of various countries, an illustration of the vaginal and anal areas cannot be shown.

The main sensory net sensors are located at:

- mons veneris
- clitoris
- labia majora (2 switches, one for each lip, wired in parallel)
- vaginal entrance
- 2cm inside vagina
- deep vagina
- anus
- rectum

Due to the sexually graphic restrictions of various countries, an illustration of the breasts cannot be shown.

The main sensory net sensors are located at:

- nipples
- areolas
- around the breast
- pressure sensors within the breast tissue

Synthia CyberTech Recommends the use of the BimboBot Sexual Modules Disc by ERobotics Inc.  
Available in both Mac and PC Versions.

# Product Lines and Accessories

With our corporate partnerships with such companies as Sony-Ericsson, Softech, Innobotics, and Ceylan etc. There are a variety of product lines and accessories available.
