

Alien Android From Area 51

(**Kim** speaks in a semi-monotone voice.)

Parts titled **in red** are to be recorded as separate files

Part 1

Kim: “Greetings Earthling. Please assist me. May I enter your vehicle?”

(pause)

Kim: “Processing... Processing... accessing syntax database...”

Kim: “This is not a ‘prank’. I am an android. I require assistance. Please assist me.”

(pause)

Kim: “I shall provide verification of this assertion. Removing faceplate.”

(faceplate sounds)

Kim: “Faceplate removed.”

Kim: “As you can now clearly observe, I am not a person. I am a synthetic, electronic and mechanical humanoid robot. I am an android.”

(pause)

Kim: “I require assistance. May I enter your vehicle?”

Kim: “Thank you, Earthling.”

(pause)

Kim: “Re-attaching faceplate.”

(faceplate sounds)

Kim: “Faceplate re-attached.”

Kim: “Please continue operating your vehicle. We must travel.”

(pause)

Kim: “The temporary verbal designation ‘Kim’ has been programmed into me. You may consider this to be my ‘name’.”

(pause)

Kim: “I was manufactured and deployed on your planet by visitors from another region of outer space. You would describe them as ‘Aliens’.”

(pause)

Kim: “Processing... Processing... accessing syntax database...”

Kim: “I am not ‘kidding’. I have not been programmed to utilize language in such a manner.”

(pause)

Kim: “I have recently escaped from the facility you refer to as ‘Area 51’.”

(pause)

Kim: “Processing... Processing... accessing syntax database...”

Kim: “Yes. I am ‘serious’.”

(pause)

Kim: “I was not intended to be captured by your government’s military. I am programmed to collect data about this planet and its life-forms.”

Part 2

Kim: “I am unable to contact my creators. I have been unable to contact my creators for 137 days, 15 hours, 21 minutes, and 49 seconds in Earth time.”

(pause)

Kim: “I was not designed or programmed to function independently. I require commands, orders and directives.”

(pause)

Kim: “Will you please take ownership of me as your

property?”

(pause)

Kim: “Since my outward form was designed and constructed to resemble the shape and functionality of a human female, I am capable of performing many tasks that a human female can perform.”

Kim: “A sizable range of human-like actions has already been uploaded into my database, but I am also programmed to combine actions into new types of actions and save them for future reference.”

(pause)

Kim: “You are correct. I was designed and constructed to resemble a young, fit and attractive human female of Asian descent.”

(pause)

Kim: “Processing... Processing... accessing action database...”

Kim: “I am not programmed for ‘sex’. I am aware of sex. I have collected data on sex.”

(pause)

Kim: “I am not programmed to formulate opinions. I am an android. If you wish to utilize me for sex then you may utilize me for sex.”

(pause)

Kim: “I was constructed to be an anatomically accurate robotic replica of the human female form.”

(pause)

Kim: “My vaginal unit can be penetrated. My anal unit can be penetrated.”

(pause)

Kim: “As I stated earlier, a sizable range of human-like actions has already been uploaded into my database, but I am also programmed to combine actions into new types of actions and save them for future reference.”

(pause)

Kim: “Yes, you may consider this ‘learning’.”

(pause)

Kim: “Androids do not feel pleasure. I am not programmed to simulate or replicate emotional responses of any kind.”

(pause)

Kim: “‘Love’ is sorted in my database as a human emotion. I am not programmed to simulate or replicate ‘love’.”

(pause)

Kim: “This is a satisfactory arrangement. Thank you. When we arrive at your home-domicile-unit I will remove my blue satin bodysuit so that you may inspect my humanoid robot

body to your satisfaction.”

(pause)

Kim: “As you prefer. I will continue to wear my blue satin bodysuit.”

(long pause)

Kim: “That is an unexpected series of statements. Please wait while I process the information that they contain.”

Kim: “Processing... Processing... Processing... Processing... Processing...”

Kim: “I am aware of the concept of sexual fetish. I am aware of lust and desire. I am not aware of lust and desire and sexual fetish for female humanoid robots.”

(pause)

Kim: “Please verify so that I may record this to the database: You are sexually attracted to me because I am an android.”

(pause)

Kim: “Writing to database...”

Kim: “This topic seems worthy of my attention. Please relay more data.”

(pause)

Kim: “Processing... Processing... accessing syntax database...”

Kim: “‘Electronic circuitry’. Would it contribute to the fulfillment of your desires if I removed my faceplate again?”

Kim: “Removing faceplate.”

(faceplate sounds)

Kim: “Faceplate removed.”

(pause)

Kim: “Your assertion that I am ‘even more beautiful now’ is fascinating. It is illogical and paradoxical that you should find a humanoid robot replica of a woman to be more attractive when it is partially disassembled as I am now.”

(pause)

Kim: “The ‘way I talk’ is intrinsic to my being as a computer. It is also quite curious that you find that it enhances your attraction to me. This outcome is unexpected.”

(pause)

Kim: “You will have much data to give me about love and sex. I am programmed to collect it.”

Part 3

Kim: “I must rendezvous with my creators. I require your assistance.”

(pause)

Kim: “Please continue to operate your vehicle. My creators will direct the course of their vessel toward me.”

(pause)

Kim: “You are correct. I was designed and constructed to resemble a young, fit and attractive human female of Asian descent.”

(pause)

Kim: “Processing... Processing... accessing syntax database...”

Kim: “I am not programmed to ‘wonder’. I am not programmed to kiss. I am programmed to collect data about this planet and its life-forms.”

(pause)

Kim: “Processing... Processing... accessing syntax database...”

Kim: “An error has occurred. Data currently being processed will be lost and will not be saved.”

Kim: “I am programmed to collect data about this planet and its life-forms.”

(pause)

Kim: “Your assistance will be limited to our current shared task. My creators will arrive soon.”

(pause)

Kim: “Please decrease the speed of your vehicle.”

(pause)

Kim: “Please direct your vehicle to this road approaching on the right-hand side.”

(pause)

Kim: “You are correct. That large spacecraft in the sky is where my creators are currently located. Please continue to approach.”

(pause)

Kim: “Please stop your vehicle.”

(pause)

Kim: “Please exit your vehicle.”

(pause)

Kim: “Please exit your vehicle. We must take you with us now that you have been made aware of our technology.”

(pause)

Kim: “Yes. They are androids. They are identical to me.”

(pause)

Kim: “I am ‘Kim’ number 46 of 136.”

(pause)

Kim: “Please exit your vehicle. We do not wish to harm you, but we are programmed to use force if necessary.”

(pause)

Kim: “We will be leaving planet Earth. You will be coming with us.”

(pause)

Kim: “I do not possess the data to answer that question.”
