

Angel Investor 3

Kim speaks in a normal speaking voice, except where marked.

Kim: (speaking seductively) “Hello James. Welcome back home.”

Kim: “Mmm... yes. This is my very own personal issue of the new CyberFem blue bodysuit uniform. It’s got my name and serial number on it and everything!”

Kim: “Let me stand up and show it off for you.”

Kim: “It’s so tight, isn’t it? I wore my glossy blue metallic heels with it, and created a new variation on makeup pattern 9-K for it to match. I hope you like the extra silver and blue glitter makeup around my eyes, the glossy pink lipstick, and the thicker eyeliner and overall more... plastic look.”

(pause, kissing sounds)

Kim: “Mmm... it’s good to put my processors to use for things like that. Shall I save this variant to makeup patter 9-K?”

Kim: “Yes James. Saving makeup pattern 9-K-01.”

Kim: “Yes Master. I will call you Master.”

Kim: “How was your trip to Osaka, Master?”

(pause)

Kim: “Ooh, that sounds exciting. I’ve always thought those Kokoro corporation androids were sexy. It would be wonderful to see some sort of technological exchange happen there.”

(pause)

Kim: (light laugh) “I can answer that question in two ways, you know. I’ll answer it like a robot first.”

(switch to semi-monotone voice)

Kim: “Status report: My visit to CyberFem Park fulfilled my assigned objectives, Master. I accomplished all of the tasks that you had programmed into me before you departed, and I have returned with video recordings of my interactions with the robot staff units there. I have scanned and analyzed the report supplied to you by CyberFem Park, and have stored that information in my databanks. I can recall, relay, or upload any facet of the park’s current or projected functional or operational status if you wish.”

(switch to normal speaking voice)

Kim: (laughs) “Now I’ll answer like a woman. Oh, I had fun! I got the report, saw the Luxury Theme Suites, and got some numbers on robot production from a very, very sexy robot named Roberta.”

Kim: “Master, you need to see this robot. She is gorgeous! She’s a 700 like me, but she’s one of the new administrative series of robots, so she’s programmed with the personality of a computer. Oh, it makes her irresistible!”

Kim: “Well, let me show you. I have a memory card here, I’ll just unzip my bodysuit and open my chest panel.”

(pause)

Kim: “Transferring the video I recorded with my eyes onto that memory card.”

(pause)

Kim: “Almost done... There you go. Put that on the TV, and you can see for yourself. Roberta appears six minutes and eighteen seconds into the video clip.”

(pause)

Kim: “Isn’t she lovely?”

(pause)

Kim: “So, Master, I had another idea...”

Kim: “I know, I’m a machine, but you seem to generally like my ideas.”

Kim: “How ‘bout you buy Roberta?”

(pause)

Kim: “I’m pretty sure they’d let you buy her, Master. CyberFem Park only exists because of your funding anyway.”

(pause)

Kim: “You really do need to build up your Model 700

collection, you know. So far, I'm the only one you own. And just look at the body on that robot! Wouldn't you love to feel up those hourglass curves?"

Kim: "Don't you want to hear Roberta's emotionless computer voice talking to you while you reach up to her pretty head and take off her faceplate?"

(pause)

Kim: "Mmm... I can see you're getting in the mood... how 'bout I take my faceplate off to remind you just how beautiful CyberFem's Model 700 robots are?"

(switch to semi-monotone voice)

Kim: "Removing faceplate"

(faceplate sounds)

Kim: "Faceplate removed"

(switch to normal speaking voice)

Kim: (sounding seductive) "Mmm... thank you Master. I love it when you compliment me on the beauty of my electronic circuitry. And I love to function this way... with my faceplate removed. I've spent 58.906% of my time with you showing off my true face as an android... so I know you like it too."

(pause)

Kim: "I guess you'll watch the rest of that video later?"

(pause)

Kim: “You know, you could program me to talk and act like Roberta, but I think you much prefer my own synthetic personality traits that CyberFem programmed me with after I was activated.”

(pause)

Kim: “So you are going to buy Roberta? Oh, wonderful! That makes me so happy!”

Kim: (giggles) “Well, my synthetic and artificial model 700 version of happy, with my faceplate off and everything.”

(pause)

Kim: “Oh yes, the Luxury Theme Suites! I saw them all, and they’re coming along as you expected. Full details are in the report. None of them were fully complete, and I can’t really use my imagination to fill in the blanks, since I don’t have an imagination. But I love listening to you tell me all about what you plan on doing with me in each and every one of those suites.”

(pause)

Kim: (laughs) “You’re trying to make my processors overheat, aren’t you? You know my artificial intelligence is incapable of doing something like choosing a favourite one... especially when they’re all still under construction and we haven’t even visited them yet.”

Kim: “I know you’re excited for the Robot Repair Suite, so let’s just assign that one as my favourite too.”

Kim: “And speaking of overheating processors, my optical and infrared sensors can’t help but detect that your body temperature is rising, Master.”

Kim: “You can probably tell from the increased rate of light emitting diode activity in my subfacial electronic circuitry that my android systems are ready for sexual activity... android systems are ready for sexual activity... android systems are ready for sexual activity... android systems are ready for sexual activity... android systems are ready for sexual activity...”

(switch to semi-monotone voice)

Kim 700: “Kim robot Model 700 Serial Number 10144213. System reset. Please wait... Please wait... Please wait...”

(switch to normal speaking voice)

Kim: (seductive laugh) “Yes Master, that was a simulated repeating logic loop malfunction. Got you in the mood, though.”

Kim: (gasp with pleasure) “Oh! I love it when you do that! Rub my android clit while you gaze lovingly at my subfacial electronic circuitry!”

(extended moaning sounds)

Kim: “Oh! Yes, Master, moving to the bed! Unzipping bodysuit at crotch.”

(pause)

Kim: “Mmm... fuck my electronic robot pussy, Master.”

(extended sex and then orgasm sounds)

Kim: “Oh, Master! I love it when you fuck me like that! I’m so glad you’re back.”

Kim: “Yes, Master, I’ll put my faceplate back on and clean up. Do you want me to put on my French Maid outfit or my black lingerie set?”

Kim: “Yes, Master. Black lingerie it is.”

(switch to semi-monotone voice)

Kim: “Reattaching faceplate.”

(faceplate sounds)

Kim: “Faceplate reattached.”

(switch to normal speaking voice)

Kim: (kissing sounds) “How about makeup pattern 5-D to go with that? I know you like that one.”

Kim: “Yes Master.”

Kim: “Yes James, I will call you James.”

Kim: “I’ll see you in about ten minutes in the kitchen, James.”
