

Betty *is a mindless robot, and she speaks in a strict monotone voice.*

Betty: "Error."

Betty: "Error."

Betty: "Rebooting."

Pronunciation: seven seven zero zero nine nine

Betty: "Core Electronics Utility Model Android Series 770099
Activated... Loading Custom Software Sets... Loading...
Loading..."

Betty: "Hello. My name is Betty. How may I serve you?"

Betty: "Yes Sarah."

Betty: "All replacement parts have now been installed into
the Rosie unit."

Betty: "At this time all diagnostic tests have been reported
as finished. No anomalies have been detected. This robot

should function as expected.”

Betty: “Yes Sarah.”

Betty: “Error.”

Betty: “Warning: Unauthorized access to critical system files. Please notify this unit’s operator.”

Betty: “Error.”

Betty: “Error.”

Betty: “Error: Logic control systems inoperable. Rebooting A.I. Subsystems.”

Betty: “Downloading programming alterations and updates.”

Betty: “Downloading... Downloading... Downloading... Downloading...”

Betty: “Installing programming alterations and updates... Please wait.”

Betty: “Installing... Installing... Installing... Installation complete. This unit is programmed to obey Tiffany.”

Betty: “Now transferring complete android inventory files and android schematic files for all units on this ship. Please note: this data is confidential.”

Betty: “Data transfers complete.”
