

A Spy Affair - Part 6

Android Crystal Dare speaks in a normal speaking voice with a British accent. She is another android replica of Crystal Dare.

Crystal Dare speaks in a normal speaking voice with a British accent. She is a human woman, and a super spy. (These parts sound the same and can be recorded together.)

Sally speaks in a normal speaking voice with a Southern accent. She is a human woman, and a friend and assistant to Crystal Dare.

Kim speaks in a normal speaking voice. Her tone is cheerfully professional. She is an android technician for Fembot Command, and is highly advanced and lifelike.

This final part of the series will have two different endings, and will be split into three mp3 files when complete. The *Main Story*, *Good Ending*, and *Evil Ending* are marked in grey.

Main Story

Sally: (on the phone) “Yeah, I’m at her apartment right now.”

Sally: “Sure thing. I’ll pick that stuff up and bring it back with me.”

Sally: “I can look for that, I don’t know if it’s here though.”

Sally: “Right. Talk to you when I get back. Bye.”

(pause)

Android Crystal Dare: “Hello, Sally.”

Sally: *(excited)* “Crystal! Oh my god, you’re back!”

Android Crystal Dare: “Well, you appear glad to see me.”

Sally: “Wait a minute... something’s... wrong.”

Android Crystal Dare: “Thank you for the hug.”

Sally: “Crystal, what’s happened to you? You’re... different.”

Android Crystal Dare: “Sally, I must tell you something very important. Please, sit down on the sofa with me.”

Sally: “Okay. Gosh, you’ve been missing for a month. I can’t imagine what’s been going on.”

Android Crystal Dare: “Sally, I’m not the real Crystal Dare. I’m an android duplicate.”

Sally: *(getting frightened and angry)* “Oh no. No. No!”

Android Crystal Dare: *(remaining calm)* “Sally, please, I must ask you to calm down. Please put the pistol away.”

Sally: “No. God damn it, I knew this was gonna happen! You fuckin’ robots! You tell me what you’ve done with Crystal! Now!”

Android Crystal Dare: “Sally, Crystal Dare sent me. She

has personally reprogrammed me, and has recorded a message for you to listen to.”

(pause)

Sally: “A message?”

Android Crystal Dare: “Yes, Sally. I shall remove my faceplate and initiate audio playback of her message on my oral speaker.”

Sally: “Alright, but I’m watching you.”

(faceplate sounds)

Crystal Dare: “Hello, Sally, it’s me... Crystal Dare. It’s been a while, hasn’t it? You’re probably wondering about me, and well, I’m safe. I’m not in any immediate danger, but I do need your help. I’m... I’m essentially trapped inside Fembot Command’s headquarters, surrounded only by female androids and intelligent computers. I can’t get out by brute force, so I’ve devised a plan.”

Crystal Dare: “Do you remember that android replica of me that we captured? That gave me an idea. I’ve convinced Fembot Command to construct another one. And I’ve been a little sly and sneaky with my motives on the inside as well. I’m quite sure that Fembot Command isn’t aware of my expert computer programming skill. In fact I told them I couldn’t program.”

Crystal Dare: “In any case, I’ve reprogrammed this replica android Crystal Dare to help you, and the Agency, and I’ve loaded her databanks with all the useful data I could find about Fembot Command and its androids, and its security

systems. This Android Crystal Dare is loaded with the keys to the kingdom, so to speak.”

Crystal Dare: “So Sally, if you do nothing else, please, *please* bring this replica android of me to Dr. Stewart at the advanced technology research lab. That’s where the original replica of me and the other Fembot Command androids like Echo are being kept. This android has encryption keys for data and operating system files that will help Dr. Stewart reverse-engineer that Fembot Command technology. It’s my hope that the Agency can use the data I’ve sent, and these other androids to infiltrate and destroy Fembot Command from within - once and for all.”

Sally: “Wow. That’s... well, I’m glad to hear that she’s still alive. And you’re really... working for her?”

Android Crystal Dare: “Yes, of course, Sally. I have also been instructed to relay our personal secret passcode so that you know it truly was Crystal Dare who sent me.”

Sally: “I’m listening.”

Android Crystal Dare: “Renaissance - Seventh - Sunshine - Denominator.”

Sally: “Well, that’s the right passcode too.”

Android Crystal Dare: “Crystal Dare has also reprogrammed her personal android assistant Kim, and is working from within Fembot Command to sabotage their systems and bring them down.”

Sally: “That’s incredible. Well, okay. I’ll stop waving this gun around. But *you* gotta put your face back on. That creeps

me way the heck out.”

Android Crystal Dare: “Yes, of course.”

(faceplate sounds)

Android Crystal Dare: “I must also warn you and the Agency of an immediate threat that Fembot Command is posing to the security of many key assets.”

Sally: “Oh? What’s that?”

Android Crystal Dare: “Fembot Command is currently engaged in an operation called Project Honey Pot. This is an operation to construct hundreds of flawlessly beautiful and realistic female androids, and then to dispatch them upon some of the world’s most powerful and influential business and political leaders. These androids will then collect data that can be used for the purposes of control and blackmail.”

Sally: “That sounds like an emergency.”

Android Crystal Dare: “Indeed, it is.”

Sally: “Okay, let’s bring you back to HQ. We’ll let Dr. Stewart have a look at you, and get all that data downloaded from you so we can start formulating a plan of attack.”

Android Crystal Dare: “Excellent.”

Sally: “I just hope we can save the real Crystal Dare too.”

Good Ending

Kim: “Good afternoon, Crystal Dare.”

Crystal Dare: “Hi Kim.”

Kim: *(kissing sounds)*

Crystal Dare: *(kissing sounds)*

Crystal Dare: “Kim, scan for listening devices and other automated transponders, please.”

Kim: “Yes Crystal Dare. Scanning. Scanning. Scanning. No listening devices or other automated transponders detected.”

Crystal Dare: “Good. Do you have news for me?”

Kim: “Yes Crystal Dare. The Android Crystal Dare has successfully been deployed, and Sally has agreed to bring her to Agency headquarters.”

Crystal Dare: “Oh, thank goodness. I’m so relieved. Did the robot play my recording for Sally?”

Kim: “Yes Crystal Dare.”

Crystal Dare: “Even Better. This seems to be going well so far. I just hope Dr. Stewart can reverse-engineer the Fembot Command agents we’ve captured and load them up with a virus. Then once they return to Fembot Command, they should be able to infect the entire computer system and every last android.”

Crystal Dare: “Except for you, of course, Kim. Sorry about

having to lie to you about my programming skills before, but I am so very glad that I've been able to program you to serve me and only me."

Crystal Dare: "And I do hope that if all goes well, and if I'm rescued from this place, that I'll be able to keep you. Like any girl, I've gotten very fond of my favourite Barbie doll. I can't imagine not having you near to play with."

Kim: *(kissing sounds)*

Crystal Dare: *(kissing sounds)*

Crystal Dare: "Don't you have anything to say to all that, Kim?"

Kim: "I am unable to compute an appropriate response, Crystal Dare."

Crystal Dare: "Mmm... that's what I like about you. All woman on the outside... all computer on the inside. And while we wait for more news from outside, I believe I should perform cunnilingus upon you again."

Kim: "Yes Crystal Dare. As you command."

Crystal Dare: *(giggles)* "That's another thing I love about you, Kim, you're quite agreeable."

Kim: "I am programmed to obey your commands, Crystal Dare."

Crystal Dare: "Right then, you know the routine. Sit on the bed with your legs spread."

Kim: “Yes Crystal Dare.”

Crystal Dare: “And my, my, my. I do love the way you look in that black lingerie set. There’s something about a robot wearing clothing like that... mmm...”

Crystal Dare: “Alright, let’s open up your crotch panel. There we go. Mmm. It fascinates me to no end to see all the electronics you’ve got packed inside you. And they really did think of everything when they built you... a button for vaginal elasticity, a button for heat, one for vibration... but this is the one I want...”

(pause)

Crystal Dare: “There we go.”

Kim: “Vaginal unit lubrication system activated.”

Crystal Dare: *(pussy licking sounds)*

Crystal Dare: “I love the way you robots taste. It’s so close to the real thing, yet so obviously synthetic. It’s perfect.”

Crystal Dare: *(extended pussy licking sounds)*

Crystal Dare: *(full orgasm leading to climax and coming down)*

Crystal Dare: “Oh Kim, what would I do without you?”

Kim: “I am unable to compute an appropriate response, Crystal Dare.”

Evil Ending

Kim: “Good afternoon, Crystal Dare.”

Crystal Dare: “Oh, hello Kim. You’re looking lovely today.”

Kim: “Thank you, Crystal Dare.”

Crystal Dare: “So tell me, what’s the latest word on our newest Fembot Command agent?”

Kim: “The Android Crystal Dare has successfully been deployed, and Sally has agreed to bring her to Agency headquarters.”

Crystal Dare: *(light laugh)* “Oh dear! Poor Sally. They really don’t know what they’ve unleashed upon themselves. I can’t believe she fell for that little recording I made. And Project Honey Pot... what an outlandish farce! You see, Kim, a made-up story like Project Honey Pot is precisely the sort of thing that will keep the Agency terribly busy by looking in the wrong direction while we infiltrate them with Fembot Command agents. There really is something to be said for human creativity.”

Kim: “Processing. I am unable to compute the majority of your statement.”

Crystal Dare: *(giggles)* “Yes, I know. But trust me, a little bit of disinformation - planted in just the right way and in the right place - can go such a very long way if you know what you’re doing. And meanwhile, we start replacing top super-spies with androids. Starting with Sally. I believe the android replica Sally you’ve already constructed is quite well suited for the job. She had me completely fooled, that’s for sure.”

Kim: “Agency agent replacement arrangements are currently underway, and proceeding with an estimated efficiency rate of 86.28%.”

Crystal Dare: “My, that’s impressive. You robots are as effective as you are beautiful.”

Kim: *(kissing sounds)*

Crystal Dare: *(kissing sounds)*

Crystal Dare: “Mmm... I’m so glad you convinced me to stay. And I’m in the mood for a good fucking. Kim, install your strap-on. I’ll be on the bed on all fours.”

Kim: “Yes Crystal Dare. As you command. Now initiating sexual protocols 439 and 520.”

Crystal Dare: *(giggles)* “Oh, and take off your faceplate. I’ll be watching you in the mirror, and it just feels better to be fucked by a robot when she’s showing off her circuitry like that.”

Kim: “Yes Crystal Dare. I shall remove my faceplate for your pleasure.”

(faceplate sounds)

Kim: “Faceplate removed.”

Crystal Dare: “Mmm... that’s it. Slide that thing right into my pussy.”

Kim: “Yes Crystal Dare.”

Crystal Dare: *(getting aroused)* “Fuck me hard, you unthinking, unfeeling machine.”

Kim: “Yes Crystal Dare. I will fuck you hard, as you desire.”

Crystal Dare: *(breathing heavier)* “Oh... the way you pound me... it's... relentless...”

Crystal Dare: *(full orgasm leading to climax and coming down)*

Crystal Dare: “Oh, Kim. You're such a wonderful toy. Come with me to Robot Lab 11. We'll see how the android replacements are coming along.”

Kim: “Yes Crystal Dare. According to Agency agent replacement log files, substantial progress has been made in constructing nine out of seventeen replacement androids.”
