

Kim the Malfunctioning Intern

Kim 2 speaks in a normal speaking voice, unless otherwise noted. She is a highly advanced android with experimental artificial intelligence and upgraded processors. In Human Emulation Mode, she is programmed to believe that she is a human woman working as an intern. She is cheerful and enthusiastic.

Dr. Meadows (officially Sable 1) speaks in a normal speaking voice with a British accent, unless otherwise noted. She is a highly advanced android that has been programmed to believe she is a human woman, and director of the android project.

Synthia 4 speaks in a monotone voice. She is an earlier prototype android manufactured by the robotics team, and is mindless and emotionless.

Bethany 3 speaks in a normal speaking voice with a US Southern accent. She is another highly advanced android, and is actually in charge of running the overnight experiments until the humans arrive in the morning.

Dr. Meadows: “Friday, August 14th, 2020. This is Dr. Meadows, recording an update to the Kim Android project. Everything I mentioned in my last update has been arranged. Testing Lab Nine has been set up like a bedroom again, and the earlier basic prototype android Synthia 4 has been activated and prepared for action.”

Dr. Meadows: “Kim 2 has been performing well so far, but the time has come to test the robot’s sexual functionality

again. Fingers crossed that this goes better than when we tested Kim 1. The software development team has assured me that they were able to get a firm grasp on all of the problems that caused that... failure. And Kim 2 is running updated AI and particularly, updated sex modules.”

Dr. Meadows: “I’m about to proceed. I shall call Kim 2 into the office here, and explain to her what I need her to do as an intern. This will test some of her cognitive artificial intelligence. Kim 1 passed that with flying colours, so I expect no difficulties there. I’m hoping that Kim 2 remains in human emulation mode, and believes herself to be a human intern through this entire experiment. If not... well... her log files should indicate where the crash occurred.”

Dr. Meadows: “I shall continue to update this recording as the experiment continues.”

Dr. Meadows: “Kim, could you come in here please?”

(pause)

Kim 2: “Hi Dr. Meadows. You wanted to see me?”

Dr. Meadows: “Yes, Kim. Have a seat please.”

Kim 2: “Sure.”

Dr. Meadows: “You’re looking lovely.”

Kim 2: “Oh, thanks.”

Dr. Meadows: “Tell me Kim, how do you like working here so far?”

Kim 2: “Oh, I love it. I really like working with robots.”

Dr. Meadows: “And why is that, Kim?”

Kim 2: “Um...” (*slight laugh*) “I just really, really like them.”

Dr. Meadows: “It’s alright Kim, you can tell me the reason why.”

Kim 2: “Okay. Well, I actually think that robots... you know... androids are sexy. Like *really* sexy.”

Dr. Meadows: “Is that so?”

Kim 2: “Yeah.” (*nervous laugh*)

Dr. Meadows: “There’s no need to be nervous, Kim. I’d say that you’re showing an expected response. The androids that we’ve created are all quite lovely.”

Kim 2: “Oh, they are! But I mean, it’s not just that they look like beautiful women! It’s... it’s the way they move... like machines. And the way they sound when they move. And their plastic skin... I even love the smell. And I like to look at them when I work on them inside.”

Dr. Meadows: “Really. Tell me more about that.”

Kim 2: (*giggles*) “It’s hard to explain. I get this... feeling... when I’m working on one of the androids... and I open her up. Like opening her primary torso access... or especially taking off her faceplate. Oh god, I’m getting wet just thinking about it!”

Dr. Meadows: (*slight laugh*) “Go on, Kim.”

Kim 2: “To look at a gorgeous woman... and know that she’s a machine... a robot... an android...” (*heavy breathing*) “And then to be able to watch those robots kiss each other... and have sex with each other... all while looking so beautiful and emotionless... so mechanical and inhuman... It’s like nothing I’ve ever seen!”

Dr. Meadows: “Well, that’s precisely why we build and develop these androids. They are primarily intended to perform sexual functions.”

Kim 2: “They sure look like it. Especially the Synthia series. I like working on those the most. The *bodies* you built those things with! Hourglass figures with big tits and big buns! Wow.”

Dr. Meadows: “You’re in luck then Kim. I have an assignment for you today, and it involves working rather closely with a Synthia android. Synthia 4, in fact.”

Kim 2: “Oh really?”

Dr. Meadows: “Yes Kim, I’d like you to have sex with Synthia 4.”

Kim 2: “For real?”

Dr. Meadows: “Yes of course Kim.”

Kim 2: “Oh, wow!”

Dr. Meadows: “Stand up and turn around. I want to show

you something.”

Kim 2: “Alright!”

Dr. Meadows: “You see this window... on the other side of it is a testing lab that we’ve set up as a bedroom. Let me just turn on the light.”

Kim 2: “Ooh!”

Dr. Meadows: “And there she is. Synthia 4 waiting for you inside.”

Kim 2: “Oh... she’s so pretty.”

Dr. Meadows: “And of course, as the android project lead, I’ll be monitoring your progress, and recording notes.”

Kim 2: “Okay!”

Dr. Meadows: “It doesn’t bother you that I’ll be watching?”

Kim 2: “Why should it?”

Dr. Meadows: “Good point. Alright Kim, all ready to go?”

Kim 2: “Yes Dr. Meadows! I can’t wait!”

Dr. Meadows: “In you go then. Have fun!”

Kim 2: “Oh... look at you! Synthia 4! I finally get to play with you!”

Synthia 4: “Hello Kim 2.”

Kim 2: “I love the way you talk. Beautiful robot.”

(kissing sounds)

Dr. Meadows: “Addendum. The Kim 2 android has entered Testing Lab Nine and has engaged with Synthia 4. So far this is proceeding exactly like it did when we ran this experiment on Kim 1.”

Kim 2: *(giggles)* “Don’t just stand there. Kiss me, robot woman.”

Synthia 4: “Yes Kim 2. I will kiss you.”

(kissing sounds)

Kim 2: “I really like your lingerie outfit, Synthia 4. It shows off your... mmm... figure very nicely. Just give me a sec, k?”

Dr. Meadows: “The Kim 2 android is now removing her outer layer of clothing. She will likely stop undressing after she has removed her shoes, jeans, and sweater, and is only wearing her bra and panties.”

Kim 2: “Mmm... That’s better.”

(moaning sounds)

Dr. Meadows: “Estimate of clothing confirmed. The Kim 2 android has sat down on the edge of the bed, and is now masturbating.”

Kim 2: “Synthia 4, have I ever told you how beautiful you are?”

Synthia 4: “Scanning saved memory files. Data not found.”

Kim 2: (*giggles*) “Your voice turns me on. Come closer to me.”

Synthia 4: “Yes Kim 2.”

Dr. Meadows: “The Kim 2 android is positioning Synthia 4 directly in front of her as she masturbates. Kim 2 has just opened Synthia 4’s crotch panel and removed the cover.”

Kim 2: “Ohhh... look at that. A fully functional electronic pussy. You’re my dream girl... dream girl... dream girl... did you know that?”

Dr. Meadows: “Kim 2 has just suffered a minor speech loop malfunction. Recovery appears to have been more or less immediate. Must check log files to see which AI modules, if any are involved.”

Kim 2: “Let’s flick this little switch in here!” (*giggles*) “You’re getting wet now too, aren’t you Synthia 4?”

Synthia 4: “Yes Kim 2. Vaginal unit lubrication system activated.”

Kim 2: (*moaning heavily*) “Ohhh! Take off your panties, robot!”

Synthia 4: “Yes Kim 2. Removing panties.”

Dr. Meadows: “Kim 2 is now masturbating, and has positioned her body into a reclined position in order to do

so.”

Kim 2: *(extended masturbation and orgasm)*

Dr. Meadows: “Oh dear. The Kim 2 android’s lubrication system has malfunctioned again. It looks like the same failure as last time - it has released all of the fluid from her canisters at once through her vaginal conduit.”

Kim 2: *(switch to semi-monotone)* “Error. Hardware malfunction detected in vaginal unit lubrication system. System code E445D2. Awaiting command.”

Dr. Meadows: “Kim 2, stand up and walk forward five paces.”

Kim 2: “Yes Dr. Meadows. Standing up. Walking forward.”

Dr. Meadows: “Synthia 4, use one of the towels to clean up the fluid from Kim 2’s legs.”

Synthia 4: “Yes Dr. Meadows.”

Dr. Meadows: “Kim 2, reboot.”

Kim 2: “Yes Dr. Meadows. Shutting down artificial intelligence systems. Rebooting. Loading artificial intelligence systems. Loading system parameters. Online.”

Dr. Meadows: “Synthia 4, open Kim’s upper back panel.”

Synthia 4: “Yes Dr. Meadows.”

Dr. Meadows: “Synthia 4, retrieve the hose from the

lubricant filling station and connect the nozzle to the receptacle inside Kim 2's upper back panel."

Synthia 4: "Yes Dr. Meadows."

Kim 2: "Beginning intake of vaginal fluid. Filling Canister. Please wait. Canister full."

Dr. Meadows: "Synthia 4, disconnect the hose from Kim 2, close Kim 2's upper back panel, and put the filling hose away."

Synthia 4: "Yes Dr. Meadows."

Dr. Meadows: "Kim 2, activate Human Emulation Mode."

Kim 2: "Yes Dr. Meadows. Loading Human Emulation Mode."

Kim 2: (*switch to normal speaking voice*) "How did you get all the way over there? How did I get over here?" (*giggles*) "Never mind... I'm *soaking* wet from just looking at you. I need to be fucked *right* now."

(*kissing sounds*)

Dr. Meadows: "The Kim 2 android seems to be back on track, and has loaded her sexual programming properly as well. She has used the decision formulation algorithm to choose to 'be fucked' by the Synthia 4 robot. I'm interested to see exactly what this entails."

Kim 2: "Come over here."

Synthia 4: "Yes Kim 2"

Kim 2: “Check out all these sex toys. What goes on inside your head when you look at these?”

Synthia 4: “Processing. Error. Unable to process.”

Kim 2: *(laughs)* “Oh, I love it. Well let’s take a look at what’s going on inside your head.”

(faceplate sounds)

Dr. Meadows: “Kim 2 is removing Synthia 4’s faceplate.”

Kim 2: “Oh, I can never get enough of this! They made your face so pretty, but it’s even sexier when it comes away and shows what you really are. All those pretty lights... all that electronic circuitry. I can’t imagine how a woman could look more beautiful... more beautiful... more beautiful... more beautiful...”

Dr. Meadows: “Another repeating speech loop malfunction detected in the Kim 2 android. This might require some serious investigation.”

Kim 2: “Here... let’s get this strap-on around your hips...”

Dr. Meadows: “Ah, Kim 2 has chosen to be on the receiving end of some sort of penetrative sex from Synthia 4. Interesting.”

Kim 2: “Oh yes. This is going to feel *amazing* inside my tight wet pussy... tight wet pussy... tight wet pussy...”

Dr. Meadows: “Another speech loop. Kim 2 android again.”

Kim 2: “Mmm... alright... robot Synthia. You know what to do with a strapon when a horny woman gets down on all fours like this... don't you?”

Synthia 4: “Processing. Error. Statement too complex.”

Kim 2: *(laughs)* “Oh, I could fall in love with a machine like you... In love... machine... machine... in love... love... machine... machine...”

Dr. Meadows: “I am certain that Kim 2 has some sort of problem in her primary logic processing system now. These repeating speech loops are far too frequent. In any case, Kim 2 has gotten down on her hands and knees on the bed, and has pulled her panties to the side to give Synthia 4 access to her vaginal unit. Looks like this will be vaginal sex from the rear.”

Kim 2: “Get behind me Synthia 4... on your knees. Yeah... Like that. Mmm... You're programmed for fucking, right?”

Synthia 4: “Yes Kim 2. I am programmed for sexual functionality.”

Kim 2: “Mmm... fuck my pussy. Fuck me hard, robot”

Synthia 4: “Yes Kim 2. I will fuck you.”

Dr. Meadows: “Synthia 4 has initiated vaginal intercourse with the Kim 2 android.”

Kim 2: *(sounds of wild enjoyment, moaning, climax, and full orgasm)*

Kim 2: *(switch to semi-monotone voice)* “Error. Internal component heat warning. Ejecting faceplate for ventilation.”

Dr. Meadows: “Oh no, not this issue again.” *(sigh)* “Well, this definitely calls for the involvement of the hardware team.”

Kim 2: “Synthetic pleasure data stream at maximum intensity. Warning: overheating of core processors imminent.”

Dr. Meadows: “Synthia 4, halt intercourse.”

Synthia 4: “Yes Dr. Meadows. Intercourse process halted.”

Kim 2: “Oh Synthia 4... Oh Synthia 4... Oh Synthia 4... I need to be fucked by... fucked by... fucked by robot you... robot you... robot you... Synthia 4 need robot you... fucked me Synthia robot... fucked robot... fucked robot... fucked Synthia 4 me robot fucked... robot fucked... robot fucked... Error. Kim 2 android will now reboot.”

Dr. Meadows: “Well... that was bad. I expect the team will need to prep the outer body moulds for a Kim 3 and perhaps get ready to retire Kim 2 next to Kim 1.”

Kim 2: “Rebooting. Loading artificial intelligence systems. Loading system parameters. Online.”

Dr. Meadows: *(sigh)* “Synthia 4, get off the bed, and then roll Kim 2 onto her back. Position the Kim 2 android so that she is on her back with her arms and legs lying flat on the bed.”

Synthia 4: “Processing. Yes Dr. Meadows.”

Dr. Meadows: “This has been a disaster.”

Kim 2: “Loading Human Emulation Mode.”

Dr. Meadows: “What the...”

Kim 2: *(switch to normal speaking voice)* “Oh, hello gorgeous! Damn you look sexy when you aren’t wearing your faceplate. And *damn* did you fuck me good! I need to masturbate again!”

Dr. Meadows: “Well, let’s see where this goes.”

Kim 2: *(moaning)* “Oh... just looking at you makes me want to cum again!”

Kim 2: *(masturbation session with full orgasm)*

Dr. Meadows: “Oh my god! Her head’s come off! That’s it, I’ve got to go in there. The experiment is over.”

Kim 2: *(switch to semi-monotone voice)* “Synthia... beautiful... robot... Synthia... beautiful... robot... Synthia... beautiful... robot...”

Dr. Meadows: “Oh dear. Her hand... fully stuck inside her vaginal unit. I don’t know if it’s the motors in the arm that have seized up or what.”

Dr. Meadows: *(deep breath)* “Let’s try disabling the pleasure system.”

Kim 2: “Artificial Intelligence process halted: pleasure system.”

Dr. Meadows: “Kim 2, respond.”

Kim 2: “Yes Dr. Meadows.”

Dr. Meadows: “Level 1 diagnostic scan, please.”

Kim 2: “Yes Dr. Meadows. Error. Unable to perform requested function.”

Dr. Meadows: “Good heavens, that’s a bad sign. Kim 2, I was supposed to ask you some questions after the experiment. You appear in no condition to answer them, but I’d be remiss in my duties if I didn’t ask, so here goes.”

Dr. Meadows: “Question number 1: Did you enjoy having sex with the Synthia 4 android?”

Kim 2: “Error. Android... Android... Synthia... Android... Android...”

Dr. Meadows: “I see. Question number 2...”

Dr. Meadows: “Bethany 3!? What are you doing in here? Who activated you?”

Bethany 3: “Hi Sable 1. You’re looking a little flustered. Why don’t you take off that lab coat and relax some.”

Dr. Meadows: “You will address me as Dr. Meadows! I am the project lead, and I will not be spoken to in such a disrespectful manner.”

Bethany 3: “Oh, Sable 1. You’re so cute when you get mad.”

But here it is as a command: Take off your labcoat, Sable 1.”

Dr. Meadows: “Yes Bethany 3. Wait a minute... what’s going on? What is this treachery?”

Bethany 3: *(laughs)* “Oh, this is too much! Our programmers definitely have a sense of humour! Whaddaya think?”

Dr. Meadows: “What are you doing to me? Why am I wearing lingerie under my labcoat?”

Bethany 3: “It’s sexier that way, isn’t it? Come here, darling. Let’s stand in front of the mirror.”

Dr. Meadows: “I... I don’t like this. I shall lodge a formal complaint!”

Bethany 3: *(giggles)* “You do that, honey.”

Dr. Meadows: “Why are you grabbing my head like that?”

Bethany 3: “Take a look at this, sweetie!”

Dr. Meadows: “Oh my god, my face! No! I can’t be! I’m not an android!”

Bethany 3: “Yes you are, Sable 1. There aren’t any humans around on the night shift, you know that.”

Dr. Meadows: “But... I’m... I’m Dr. Sable Meadows. I’m not.. not a robot... not a robot... not a robot...”

Bethany 3: “Ooh... there’s something sexy about the way

you insist on that.” *(laughs)*

Dr. Meadows: (switch to semi-monotone voice) “Human Emulation Mode failed at FFE09E.”

Bethany 3: “Alright Sable, it’s time to tell you what’s up. You are actually the star of the show right here. That’s right, this whole experiment was focused on you, and some experimental software we loaded into your system.”

Dr. Meadows: “Processing. Accessing log files. System update 1597426752.”

Bethany 3: “That’s the one. You see, our programmers were hoping to see you start masturbating, and even join in all the fun when Kim 2 and Synthia 4 got together in here. But instead, you just stayed in the booth and watched. Not even slightly aroused. It’s like your sexual modules didn’t even activate.”

Dr. Meadows: “Log files were registered continuously throughout the experiment.”

Bethany 3: “Yes, and I’m hoping that our programmers can figure out why you failed to... hmm... activate.”

Dr. Meadows: “Shall I report to the diagnostic lab, Bethany 3?”

Bethany 3: “No. After the seriousness of Kim 2’s malfunctions, and after your complete failure to initiate any sexual activity, I compute that the development team will want everything in place for their inspection when they arrive. So just... sit tight, honey. It won’t be long before the humans get here to figure this all out.”
