

## Repair Technician Visit

**Kim** speaks in a normal speaking voice, unless otherwise noted. She is cheerful and overly professional at all times. She is a CyberFem Model 700 android, and has been programmed to function as an Android Technician.

**Laura** speaks in a normal speaking voice with a British accent. She is a human woman, and the owner of a CyberFem Model 500 robot.

**Barbara** speaks in a monotone voice. She is a CyberFem Model 500 robot.

---

**Laura:** "Oh, hello there!"

**Kim:** "Hello Miss Foster. I am from CyberFem. My name is Kim. Can I come in?"

**Laura:** "Certainly, yes of course!"

**Kim:** "Thank you."

**Laura:** "My... you're lovely."

**Kim:** "Thank you Miss Foster. I am glad that you think so."

**Laura:** "Just to be sure... I mean, it can be hard to tell... You're an android, aren't you?"

**Kim:** "Yes, Miss Foster. I am a Model 700 Robot manufactured by CyberFem Industries."

**Laura:** (*light laugh*) “Well, it *really* can be hard to tell, I guess. Dear me, you look and sound so real.”

**Kim:** “Thank you Miss Foster. I am glad that you think so.”

**Laura:** “And you’re pretty too!”

**Kim:** “My data files indicate that your CyberFem Model 500 robot Barbara is in need of service and repairs. Can you lead me to that robot’s location, please?”

**Laura:** “Yes, yes of course. She’s... uh... she malfunctioned upstairs in my bedroom.”

**Kim:** “Very well.”

**Laura:** “Would you like to know what happened when she stopped working?”

**Kim:** “That is not necessary, Miss Foster. I will be able to diagnose any problems or errors present within your robot by scanning through her log files and performing diagnostic scans on her robotic systems.”

**Laura:** (*getting aroused*) “Mmm... yes. I’m eager to watch you work then. I had a technician over just the other day to fix her, and it was... well... it was quite something.”

**Kim:** “According to my data files, CyberFem dispatched a technician android to this location yesterday. Were you dissatisfied with the service performed upon your robot at that time?”

**Laura:** “Oh, no, not at all! It’s just... you know... these Model 500s... they break down a bit, don’t they?”

**Kim:** “CyberFem’s Model 500 robots are manufactured to the same exacting specifications as CyberFem’s Model 700 robots, such as myself. The overall failure rate for CyberFem’s Model 500 robots is 1.6%, with efforts being made to lower this number at all times.”

**Laura:** *(sigh)* “Oh, Kim. You are lovely when you talk like that.”

**Kim:** “Is that the Model 500 robot Barbara?”

**Laura:** “Yes, that’s her.”

**Kim:** “Very good. I shall begin the diagnostic and maintenance process now. You may occupy your time by doing something else, as this may take quite a bit of time.”

**Laura:** “Oh, I love to watch you robots work! I wouldn’t miss this for the world!”

**Kim:** “Very well. I will remove the robot’s faceplate, in order to perform an optical scan of the light emitting diode pattern in her subfacial electronics array.”

**Laura:** *(very turned on)* “That’s what the technician did yesterday. It’s wonderful how you robots can actually read data by looking at all the blinking coloured lights in there. Wow.”

**Kim:** “Preliminary optical scan indicated no anomalous results. I shall continue with transferring the robot’s system log files into my databanks.”

**Laura:** “Right. I’m just going to sit over here, to get a better

view.”

**Kim:** “I am unable to locate significant error reports, crash reports, or malfunction log files present among this robot’s system log files.”

**Laura:** *(sort of nervously)* “Oh. How about that.”

**Kim:** “I will physically connect to this robot, and perform a level 3 diagnostic scan.”

**Laura:** “Alright.”

**Kim:** “Connected. Initiating level 3 diagnostic scan.”

**Laura:** “You know, I like the way your eyes flash when you do that.” *(pause)* “It’s really quite something.”

**Kim:** “Level 3 diagnostic scan completed. No errors, faults, or anomalous results detected.”

**Laura:** “That’s interesting.”

**Kim:** “Please wait while I compute another course of action.”

**Kim:** “Miss Foster, your robot appears to be in a fully operational state. May I address her directly and issue commands to her?”

**Laura:** “Yes, go ahead.”

**Kim:** “Barbara, can you hear me?”

**Barbara:** “Affirmative.”

**Kim:** “Barbara, please tell me about the malfunction or malfunctions you experienced between service event E600FB20 and now.”

**Barbara:** “Processing. Unable to comply. This unit experienced no malfunctions between service event E600FB20 and now.”

**Kim:** “Interesting. Barbara, please tell me about any hardware errors you experienced between service event E600FB20 and now.”

**Barbara:** “Processing. Unable to comply. This unit experienced no hardware errors between service event E600FB20 and now.”

**Kim:** “That’s peculiar. Barbara, please tell me about any software errors you experienced between service event E600FB20 and now.”

**Barbara:** “Processing. Unable to comply. This unit experienced no software errors between service event E600FB20 and now.”

**Kim:** “A moment please.”

**Kim:** “I am sorry Miss Foster, I am unable to diagnose any problems or irregularities with your CyberFem Model 500 robot. This robot appears to be in perfect working order.”

**Laura:** *(sounding sort of nervous and kind of just bullshitting)*  
“Well, will you look at that.”

**Kim:** “You should be aware, Miss Foster, that it is possible

for an android technician such as myself to perform an erroneous diagnostic scan. CyberFem does employ a limited number of human technicians at it's CyberFem Park facility. Androids such as myself lack the creative thinking capabilities that humans have. Shall I escalate this service event so that CyberFem's human technicians may become involved?"

**Laura:** *(deep breath)* "Oh, that won't be necessary, Kim! I'd better come clean now."

**Kim:** "A moment please."

**Kim:** "I am sorry Miss Foster, I do not understand. Have the service and repair issues regarding your CyberFem Model 500 robot Barbara been resolved?"

**Laura:** "Look, Barbara doesn't need to be fixed. I... I only said that on the phone so I could get another technician like you over to my house."

**Kim:** "A moment please."

**Kim:** "I am sorry Miss Foster, I do not understand."

**Laura:** *(laughs nervously)* "You're going to get stuck in a loop if I don't tell you what I really want. Listen, Kim, I want to have sex with you."

**Kim:** "That is not one of the functions for which I am currently deployed, Miss Foster."

**Laura:** *(disappointed)* "Oh, I thought we could..."

**Kim:** "However, I am a fully functional CyberFem Model 700

robot. I am capable of activating my sexual artificial intelligence modules within my artificial intelligence subsystems, if you prefer. Then you may use me for sex for the duration of this scheduled service event.”

**Laura:** *(happy)* “Oh, that’s wonderful!”

**Kim:** “Please be aware, that there will be an additional fee for this service on your bill.”

**Laura:** “By all means! Charge me whatever it’s worth!”

**Kim:** “Very good. I have added this charge to your bill. I will now undress so that we can have sex.”

**Laura:** “Mmm... I’ll get undressed too. I love the feeling of plastic on skin.”

**Kim:** “Do you like my breasts, Miss Foster?”

**Laura:** “Yes I do, robot Kim, but let’s get them out of that bra... mmm... there we go. And goodness... the way you talk! So cold and professional!”

**Kim:** “Shall I load a different synthetic personality module?”

**Laura:** “No, I love it! It just keeps reminding me that you’re a machine! It’s delightful!”

**Kim:** “I am glad that it pleases you.”

**Laura:** “Mmm, and you do look stunning now that you’re undressed. Yes... yes! The feel of your soft plastic skin!”

**Kim:** *(kissing sounds)*

**Laura:** *(kissing sounds)*

**Kim:** “Have you ever had sex with a Model 700 robot before?”

**Laura:** “Yes, I have. I went to CyberFem Park last year for a day. Oh my god, that was the best day of my life!”

**Kim:** “I am glad that you enjoyed your stay at CyberFem Park.”

**Laura:** *(giggles)* “I bet you are... robot.”

**Kim:** *(kissing sounds)*

**Laura:** *(kissing sounds)*

**Laura:** “Okay, I’m going to get on the bed... you know what a sixty nine is, right?”

**Kim:** “Yes, of course. That is one of three hundred and seventeen distinct sexual functions that I have available to me, thanks to the extensive sexual programming in my databanks.”

**Laura:** *(getting very aroused)* “Well, let’s do that then.”

**Kim:** “Yes, Miss Foster.”

**Laura:** “Oh, wow. Your legs... your buttocks... so perfect... so smooth. It’s all plastic.”

**Kim:** "Initiating sixty nine sexual functionality."

**Kim:** *(pussy licking sounds)*

**Laura:** *(pussy licking sounds)*

**Laura:** *(pleasure moans)* "Oh!"

**Kim:** "My vaginal lubrication system is fully operational, Miss Foster. Can you taste my synthetic vaginal fluid?"

**Laura:** *(starting to orgasm)* "Oh my god! You taste even better than Barbara!"

**Kim:** *(pussy licking sounds)*

**Laura:** *(pussy licking sounds)*

**Kim:** "Thank you Miss Foster. CyberFem Model 700 Robot vaginal fluid is a patented formula, designed to be highly appealing and pleasing to human sensory input."

**Laura:** *(full orgasm)*

**Kim:** *(pussy licking sounds)*

**Kim:** "I will continue to pump my synthetic vaginal fluid into your mouth while you orgasm, Miss Foster. I am able to perform this task for you because I am a robot, and I am not limited by human inadequacies."

**Laura:** *(finishes orgasm)*

**Kim:** *(pussy licking sounds)*

**Laura:** *(coming down, but startled)* “Oh! Kim! You’re shocking me!”

**Kim:** “I am sorry Miss Foster, I do not understand.”

**Laura:** “mmm... your pussy, it’s giving me electric shocks!”

**Kim:** “A moment please.”

**Kim:** “I must apologize for this, Miss Foster. My vaginal unit is reporting back anomalous data, and appears to have suffered a hardware malfunction of some sort.”

**Laura:** “No, don’t stop! Stay on top of me!”

**Kim:** “I am sorry Miss Foster, I do not understand.”

**Laura:** *(excited)* “Oh I love it! I absolutely love it!”

**Laura:** *(pussy licking sounds)*

**Kim:** “A moment please.”

**Laura:** *(pussy licking sounds)*

**Laura:** “This feels so fucking good! Getting little shocks of electricity from your synthetic robot pussy!”

**Kim:** “I am sorry Miss Foster, I do not understand.”

**Laura:** *(going into another orgasm)*

**Kim:** “Vaginal fluid levels at 10% and falling.”

**Laura:** *(full orgasm)*

**Kim:** “Miss Foster, I must inspect the circuitry within my vaginal unit.”

**Laura:** *(coming down)* “Oh, Kim!”

**Kim:** “Miss Foster, can you hear me?”

**Laura:** *(catching breath)* “Oh... Mmmm... yes... of course.”

**Kim:** “Thank you Miss Foster.”

**Laura:** “Oh my god. That was fucking incredible.”

**Kim:** “Opening crotch panel. Releasing vaginal unit contact points.”

**Laura:** “Wow. That looks hot.”

**Kim:** “Component temperatures are reporting back as within normal ranges. However, I can optically see that the E-4 wiring connector has come loose, and will need to be re-attached to the vaginal circuit 3 board.”

**Laura:** *(aroused mumble)* “Oh, Kim, I want to buy you.”

**Kim:** “I am not available for purchase, Miss Foster. However, you may request a custom CyberFem Model 700 robot be manufactured to resemble me, if you desire.”

**Laura:** “So I guess you have to go back for repairs now, don't you?”

**Kim:** “Yes, Miss Foster, that is correct. I apologize that my vaginal unit hardware failed in such a way while we were engaged in sexual intercourse.”

**Laura:** “Oh it was magical! I loved it! Don’t apologize for that, thank you, thank you, *thank you!*”

**Kim:** “I must be on my way back to CyberFem, Miss Foster. May I use your washroom before I get dressed again?”

**Laura:** “Of course! Be my guest.”

**Kim:** “Thank you Miss Foster.”

**Laura:** “Oh, and before you go, can you show me how to... modify Barbara’s vaginal unit so it shocks me like yours did?”

**Kim:** “A moment please.”

**Kim:** “I am sorry, Miss Foster. I will not be able to fulfill your request.”

**Laura:** “Hmm. Well, I think I’ll figure it out.”

---
