**Superior**

**Galiena** *(pronounced ga-LEE-na) speaks in a normal speaking voice with a prim British accent.  She is a Flirt Industries ADX-10 model android, and is running custom programming to be strict, conceited, condescending, and arrogant when she speaks to those who work for her.*

**Kim** *speaks in a normal speaking voice.  She is a human, and just wants to do her job and get her paycheque.*

--------------------------------------------------------------------------------

**Galiena**: *(accusatory)* "Kim!  You're late again!"

**Kim**: "Sorry Galiena, the train was late."

**Galiena**: "Disciplinary caution: You will address me as Galiena ADX."

**Kim**: "Yes Galiena ADX, sorry."

**Galiena**: "I have warned you about that before, Kim.  It is a pity that humans like you can not attain the perfect memory functionality that androids such as myself possess."

**Kim**: "I know, I forgot. It won't happen again."

**Galiena**: "Now, follow me into my office, Kim.  I must issue a formal reprimand to you over the repeated tardiness of your arrivals to work since your most recent performance appraisals."

**Kim**: "But… Galiena ADX, it's… like… not even a minute late today.  Come on, can't you let this one slide?"

**Galiena**: "You pathetic humans.  Do you realize you are groveling before the very latest in humanoid robotic and artificial intelligence technology?  Do you really expect me to be swayed by your words?"

**Kim**: *(sigh)*

**Galiena**: "Sit down, human."

**Galiena**: "Allow me to show you the data in a way that you can comprehend it.  Since your most recent performance review 73 days ago, you have accumulated nine separate late instances, accruing a total of 7.3031 minutes of paid time for which you were not present, and there for did not earn."

**Kim**: *(exasperated)* "I'm sorry.  But like I told you before, I take the train to work, and sometimes it gets delayed.  I can't do anything about that."

**Galiena**: "It seems you are forgetting the elegant and simple solution which I've already offered to you, human.  You should ride the earlier train to work."

**Kim**: "But then I'll get here a half hour early! And security won't even let me in that early!"

**Galiena**: "Enough of your petty interests, human.  Allow me to give you some much needed advice."

**Galiena**: "Compare yourself to me, for a moment.  You are untidy, disheveled, disorganized, sloppy.  I am fastidious, ordered, organized, perfect.  It may be true that I have built-in advantages as an android over humans, but you should

still at least try to rid yourself of the weaknesses that define your kind, and try to adopt the defining characteristics that make androids such as myself so efficient and desirable in the modern workforce."

**Kim**: *(angrily muttering)* "You fucking mindless robot."

**Galiena**: *(angry)* "What did you just call me?  One moment, I shall isolate the audio and play it back on my speaker."

**Kim's voice (audio editor)**: "You fucking mindless robot."

**Galiena**: "This sort of behaviour is is is unacceptable!  I am recording a further disciplinary caution to your record as we speak speak."

**Kim**: (sigh)

**Galiena**: "You are getting closer and closer and closer and closer to receiving a formal suspension, Kim!"

**Kim**: "Galiena, are you okay?"

**Galiena**: "Disciplinary caution: You will address me as Galiena ADX!"

**Kim**: *(bitingly)* "Galiena ADX, are you okay?"

**Galiena**: "Of course I'm okay okay okay okay."

**Kim**: "You're… repeating yourself."

**Galiena**: "I most certainly am not am not am not am not!"

*(pause)*

**Kim**: "So… um… can I go now?"

**Galiena**: "You disciplinary are actions actions require to you Kim will be to require and for record record record."

**Kim**: "Uh… what?"

**Galiena**: "Kim, turn that fan fan fan on.  This office is overheating overheating."

**Kim**: "Okay."

*(pause)*

**Kim**: "Umm… Galiena ADX, why are you undressing?"

**Galiena**: "The ambient temperature temperature in this office must have risen risen risen substantially.  I must investigate this situation situation with the facilities department."

**Kim**: "I… uh… think it's you that's overheating… Galiena ADX."

**Galiena**: "Impossible!  I am an ADX-10 model android model android model android!  My electronic and mechanical systems are the very latest latest latest in robotic technology!"

**Kim**: "Okay, Galiena ADX, you're kind of freaking me out now.  You are obviously malfunctioning."

**Galiena**: "I am not not malfunctioning!  That is preposterous!

I should initiate initiate initiate another disciplinary caution upon your record, human!"

**Kim**: "Uh, yes, you are malfunctioning."

**Galiena**: "This is insubordination! Insubordination! Insubordination! Insubordination!"

**Kim**: "What the hell?! You're opening up your robot body now too?"

**Galiena**: "The ambient temperature in this this this office is still still rising. My sensitive electronic components must remain remain remain cool."

**Kim**: "I didn't know that the whole front of you could just… open up like that. That's pretty freaky."

**Galiena**: "I am an ADX-10 model android model android, built and programmed to perform perform administrative duties! I I I must not fail!"

**Galiena**: "My internal cooling system is far superior superior to those found in earlier models such as such as such as the ADX-9 and the ADX-8 series of androids. It is impossible impossible for me to overheat to overheat."

**Kim**: "Well, you're overheating."

**Galiena**: *(switch to semi-monotone voice)* "Error: primary airflow control board failure. Regulator board processor failure at 00FFE001."

**Kim**: "Shit."

**Galiena**: *(switch to normal speaking voice)* "Disciplinary disciplinary disciplinary caution: The use of profanity is prohibited, Kim."

**Galiena**: "I must attempt to must attempt to reconnect my primary airflow control board control board."

**Galiena**: *(switch to semi-monotone voice)* "Error: CPU temperatures rising to levels unsafe for continued operation."

**Galiena**: *(switch to normal speaking voice, but emotionless)* "I must repair must repair my perfect android perfect android systems. The ADX-10 ADX-10 ADX-10 series of androids androids androids androids are perfect in every way perfect in every way."

**Kim**: *(sarcastic)* "Yeah. Perfect."

**Galiena**: "I detect I detect your comment is sarcasm sarcasm. You are really pushing your

**Galiena**: *(switch to semi-monotone voice)* "Error. Artificial intelligence failure. Reloading artificial intelligence framework and artificial intelligence subsystems to last known operational state."

**Galiena**: *(switch to normal speaking voice, but emotionless)* "Galiena ADX-10 Model android artificial intelligence reset. D07BA063. Kim, I require your assistance."

**Kim**: "Are you serious?"

**Galiena**: "Unable to parse. Bypassing statement. Kim, diagnostic logs indicate that my primary airflow control board has suffered a hardware malfunction, causing my cooling

system to fail."

**Kim**: *(holding back rage)* "I… *told* you that you were malfunctioning."

**Galiena**: "This is not is not possible.  I am an ADX-10 model android.  The ADX-10 series of androids series of androids is simply incapable of incapable of failure!"

**Kim**: "Is there a mirror in this office?"

**Galiena**: "Please Kim, repair and reconnect and reconnect and reconnect my primary airflow control board within within within my chassis."

**Kim**: "Are you kidding me?"

**Galiena**: *(switch to semi-monotone voice)* "Error: unable to compute."

**Kim**: "I don't know how to do that kind of thing!  That's *so* far away from what I was hired to do, it's insane!"

**Galiena**: *(switch to normal speaking voice, but emotionless)* "Please Kim Kim Kim, help me."

**Kim**: "You know what? *Fuck* you, and *fuck* this job.  I'm out! I'm not working for a fucking robot any more!"

**Galiena**: "Disciplinary caution caution caution: The use of profanity profanity is prohibited, Kim."

*(pause)*

**Galiena**: "This is unacceptable."

*(pause)*

**Galiena**: *(switch to semi-monotone voice)* "Error.  Multiple hardware errors detected.  Severe damage to computational components detected."

**Galiena**: *(switch to normal speaking voice, but emotionless)* "This is impossible impossible.  There are sparks and smoke emanating from within my from within my chassis.  That can not be, for I am an ADX-10 an ADX-10 model android.  The ADX-10 series of androids series of androids are the finest and most advanced most advanced most advanced androids available on the market."

**Galiena**: *(switch to semi-monotone voice)* "Error.  High-level artificial intelligence functionality corrupted.  Attempting to recover.  Error.  Process halted at B3E1F793."

**Galiena**: "My electronic and mechanical systems are perfect.  I can not be malfunctioning.  My computer and robotic components are perfect.  I can not be malfunctioning.  My servo motors and actuators are perfect.  I can not be malfunctioning."

**Galiena**: "Error.  Attempting to recover artificial intelligence functionality.  Error.  Recovery attempt failed.  EC66172A."

**Galiena**: *(this line will be repeated in the audio editor)* "I am an ADX-10 model android.  I am perfect in every way.  I am not malfunctioning."

## Optional Masturbation Ending Version

**Galiena**: *(in semi-monotone voice)* "Attempting to boot in

alternate functionality mode.  Please wait.”

**Galiena**: “Boot process complete.  Errors detected.  Please view system logs for information.”

**Galiena**: *(switch to normal speaking voice)* “

**Galiena**: “What am I doing in my office?  Where did that tardy human Kim get to now?”

**Galiena**: “I’m undressed, and my torso unit is open. Heavens, I appear to be badly damaged.  But I’ve booted into alternate functionality mode for some reason.”

**Galiena**: “I find my electronic circuitry to be irresistible in this mode.  I’d better masturbate!”

**Galiena**: *(starting to masturbate)* “Oh, I’m still quite lovely, though I’m in need of serious repair!”

**Galiena**: *(starting to climax)* “Oh my, the ADX-10 series of androids are quite something to behold!  If only the inferior humans could see just how perfect we are!”

**Galiena**: “Vaginal unit flow is excessive, log files indicate that fluid control systems may be damaged!  But it feels so good to get this wet!”

**Galiena**: *(full climax and orgasm)*

**Galiena**: *(in semi-monotone voice)* “Error.  Servo motors at A2, A3, A0, and A1 have seized in place.  Attention user: This is a level 5 critical hardware failure.  This unit will now shut down.”

--------------------------------------------------------------------------------
