

The Android Industry Council 1.5 - Return to HQ

(Kim 700 speaks in a normal speaking voice unless otherwise marked.)

Kim 700: “Good morning Technician Android 32. I have returned from assignment number 1438959335, Case Number 84.”

(pause)

Kim 700: “Yes. My meeting with Miss Woods went extraordinarily well.”

Kim 700: “Command received. Undressing.”

Kim 700: “I talked to Miss Woods for 8 minutes and 44 seconds. That was more than enough time for me to hack into both the corporate network of her company and her smart phone.”

Kim 700: “Blazer removed.”

Kim 700: “I was able to determine that Miss Woods’ financial services company is a high-value target, and would be an excellent asset if acquired by CyberFem’s corporate espionage division.”

Kim 700: “Skirt and high heels removed.”

Kim 700: “Preliminary data analysis conducted on the information I was able to collect indicates that while Miss Woods displays a high aptitude for accounting-related procedures, she does not display an equal level of talent for

the technical aspect of business management.”

Kim 700: “Blouse removed. Yes Technician Android 32. Sitting in examination chair.”

Kim 700: “I therefore compute that my intrusion into Miss Woods’ corporate and personal network will go completely undetected.”

(facemask sounds, switch to semi-monotone voice)

Kim 700: “Facemask removed.”

(switch to normal speaking voice)

Kim 700: “And I have even more good news for CyberFem. Immediately after I left Miss Woods’ office, she drove to the nearest CyberFem showroom. She purchased two identical Kim androids, a Model 700 and a Model 500.”

(switch to semi-monotone voice)

Kim 700: “Chest panel open.”

(switch to normal speaking voice)

Kim 700: (laughs lightly) “I can only conclude that she was infatuated by my synthetic beauty.”

Kim 700: “Miss Woods’ new CyberFem androids have been ordered to be fully capable of all sexual functions, which presents a perfect opportunity for CyberFem’s corporate espionage division.”

(switch to semi-monotone voice)

Kim 700: “Connection to diagnostic terminal established: Chest panel port 01. 1024 MB/s. 616D7E.”

(switch to normal speaking voice)

Kim 700: “Once these new androids have been assembled and programmed, they will self-deliver to Miss Woods’ office. That should occur within the next few days.”

(switch to semi-monotone voice)

Kim 700: “Connection to diagnostic terminal established: Sub-facial port 03. 1024 MB/s. B2C248.”

Kim 700: “Transmitting mission data. 505D970D70C52F5B.”

(switch to normal speaking voice)

Kim 700: “I compute that Miss Woods will bring her new Kim 700 and Kim 500 androids home to use them for sex very soon after she receives them. These androids will be programmed to scan and transmit Miss Woods’ biometric data to CyberFem. It is expected that they will have ample opportunity to scan Miss Woods while she is naked.”

Kim 700: “Yes Technician Android 32. Deactivating Human Emulation Mode. Please wait.”

(switch to semi-monotone voice)

Kim 700: “Human Emulation Mode deactivated.”

Kim 700: “Based on Miss Woods’ status as the CEO of a

high-value target, and based on my computations, it is recommended that Miss Woods be replaced by a CyberFem model 700 android in the near future.”

Kim 700: “Miss Woods is another perfect candidate for android replacement, just like Case Number 46, Case Number 61, and Case Number 78. Her marital status of single, her lack of offspring, and her singular dedication to her career should make it easy for CyberFem to construct and deploy an exact android replica of Miss Woods once the necessary biometric and identity data have been collected.”

Kim 700: “Transmission of mission data complete.”

(pause)

Kim 700: “Chest panel port 01 disconnected.”

Kim 700: “Sub-facial port 03 disconnected.”

(pause)

Kim 700: “Chest panel closed.”

(facemask sounds)

Kim 700: “Facemask reattached.”

Kim 700: “Yes Technician Android 32. Standing up.”

(pause)

Kim 700: “Yes Technician Android 32. Reporting to storage booth for charging and storage.”
