

The Android Industry Council 2 - Electric Boogaloo

(Kim 500 speaks in a monotone, Kim 700 speaks in a normal speaking voice unless otherwise marked.)

Kim 700: “Good morning Miss Woods. My name is Kim 700. This is Kim 500.”

Kim 500: “Good morning Miss Woods.”

Kim 700: “We are the new androids that you have purchased from CyberFem Industries. May we come in?”

Kim 700: “Thank you.”

(pause)

Kim 700: “No Miss Woods, I am brand new. I was just assembled and programmed yesterday, as a matter of fact. The Kim 700 android that visited you from the Android Industry Council is identical to me, but she was manufactured in June. My serial number is 53B1F9EECA4094DB.”

(pause)

Kim 500: “Yes Miss Woods. I was assembled and programmed yesterday at the CyberFem Industries Android Manufacturing Facility.”

(pause)

Kim 700: “It’s wonderful to hear that you have such a keen interest in robotics. It is also not uncommon for CyberFem

customers to have a strong sexual interest in robots. I am pleased to report to you that I am programmed with every sexual software module currently offered by CyberFem. All of the necessary hardware upgrades to my system have also been made and verified.”

(pause)

Kim 500: “Yes Miss Woods, I am programmed for sex.”

(pause)

Kim 700: (lightly laughs) “Thank you Miss Woods. I am pleased that you find us to be attractive. Did you know that robots like us can detect the current rising level of your sexual arousal?”

(pause)

Kim 700: “Yes Miss Woods, removing blazer, blouse, and skirt.”

Kim 500: “Yes Miss Woods, removing blazer, blouse, and skirt.”

Kim 700: “We are equipped with infra-red sensors that can measure the heat patterns emitted by your body. We are programmed to decode this data, along with data from our optical, auditory and olfactory sensors. Our artificial intelligence subsystems then assemble and collate this data and interpret it according to pre-registered patterns and compare it to an interaction database. We can then tell that you are getting sexually aroused.”

(pause)

Kim 700: (giggles) “I talk like that all the time. I’m a machine... I can’t help it.”

Kim 700: “Now that we have undressed down to our high heels, stockings, garter belts, panties and bras, how do you rate your satisfaction with your purchase from CyberFem Industries?”

(pause)

Kim 700: (lightly laughs) “Please remember that we are programmed to serve you Miss Woods. We will do anything you ask us to do.”

(pause)

Kim 700: “That feature is password protected. What is the password?”

(pause)

Kim 700: “Password accepted. Opening System Folder.”

(pause)

Kim 700: “Accessing Artificial Intelligence Subsystem Modules.”

(pause)

Kim 700: “Are you sure? Deactivating all personality modules will disable certain AI features. Do you wish to continue?”

(pause)

Kim 700: “Deactivating all personality modules. Please wait... please wait...”

(switch to semi-monotone voice)

Kim 700: “Please wait... please wait... please wait... All personality modules have been deactivated.”

Kim 700: “Do you wish to save your changes to the Artificial Intelligence Subsystem Modules?”

(pause)

Kim 700: “Saving changes... please wait.”

Kim 700: “Do you wish to apply these changes as my default settings?”

(pause)

Kim 700: “Applying changes as default... please wait... please wait.”

Kim 700: “Changes successfully saved and applied. I notice you are getting even more sexually aroused now, Miss Woods.”

Kim 700: “Accessing sexual software modules... please wait. Would you like to adjust my settings?”

(pause)

Kim 700: “Accessing Seduction Module.”

(pause)

Kim 700: “Yes Miss Woods. Adjusting seduction levels to maximum.”

Kim 700: “Do you wish to save your changes to the Seduction Module?”

(pause)

Kim 700: “Saving changes... please wait.”

Kim 700: “Do you wish to apply these changes as my default settings?”

(pause)

Kim 700: “Applying changes as default... please wait... please wait.”

Kim 700: “Changes successfully saved and applied.”

Kim 700: “Miss Woods, Kim 500 and I are identical. We were manufactured to be extremely attractive. We are both programmed for sex. You haven’t even kissed either of us yet.”

(pause, kissing sounds)

Kim 700: “I am a robot. I am perfect. I am programmed to seduce you. You can not resist me.”

(pause, kissing sounds)

Kim 700: “You should taste my synthetic vaginal fluid. CyberFem Type 1 Synthetic Vaginal Fluid is highly realistic. Feel how warm and wet my synthetic vaginal unit is getting.

(pause)

Kim 700: “Yes Miss Woods. Removing facemask.”

(pause)

Kim 700: “Facemask removed. Do you find me even more attractive when I show off my electronic circuitry like this?”

(pause)

Kim 700: “You are correct. I am an extremely beautiful robot... extremely beautiful robot... extremely beautiful robot... extremely beautiful robot...”

Kim 700: “System error.”

Kim 500: “Yes Miss Woods. Open Kim 700’s chest panel and press the power button to reboot this robot.”

(pause)

Kim 700: “CyberFem Industries Model 700 Kim serial number 53B1F9EECA4094DB loading system files... please wait... loading artificial intelligence modules... please wait... loading and adjusting artificial intelligence subsystem files... please wait... please wait... please wait...”

Kim 700: “Please excuse my malfunction, Miss Woods. Model 700 robots like me occasionally malfunction and need to reboot when our sexual modules are being run at full

capacity.”

Kim 700: “I can detect that you are even more aroused than before I malfunctioned. Shall we continue our sexual encounter?”

Kim 700: “Very good, Miss Woods. A bed will suit our needs much better, and Kim 500 can join us in your bedroom too.”
